Montreal, Canada, April 19, 2010. Ultimate Technographics Inc. today announced that it will demonstrate the world's fastest imposition solution at IPEX, Imposition OnDemand Digital Scalable Server Edition that is now ready to ship.

Ultimate's extremely powerful imposition technology combined with the new scalable architecture and developed in cooperation with high-volume digital printers takes the name of Imposition OnDemand Scalable Server Edition. The prototype was first staged in Chicago last fall and brought home the 'Worth of Look' mention after being presented in Ultimate's and in HP's booth amongst the partner solutions adapted for the new HP Inkjet T300 press.

Imposition OnDemand Scalable Server Edition is aimed at resolving the growing bottleneck in PDF imposition due to increasing job sizes and the increasing number of short run jobs that must be printed in a very short time. The Scalable Imposition Server Edition leverages the power of today's multiple core server computers. This exclusive solution is designed to integrate most PDF workflows in a very simple fashion, helping these workflows to deliver extremely fast PDF processing speed. In addition, the Scalable Server Edition offers more automation regarding job variables permitting the same workflow to accomplish various job configurations. This represents a milestone in the digital printing industry and it further demonstrates Ultimate's continued leadership in the market.

Digital printers with challenging volume of short runs of PDF books and for digital printers specializing in wide PDF personalized campaigns will benefit from OnDemand Scalable Server. Amongst the first installations planned for 2010 are digital printers focusing on transpromo printing.

"Imposition OnDemand Digital Scalable Server Edition is not only the world's first scalable imposition engine, but it is the fastest, point." said Roberto Marroquin, Director of Product development at Ultimate. "With the contribution of our partners and key customers, we have validated our new technology with jobs containing millions of records and hundreds of thousands of pages. In most cases, the complete imposition with barcodes was done in a few minutes." he added.

At IPEX, Ultimate Technographics solutions will be demonstrated on the company's stand 12D100 and on numerous partner's stand including Duplo, HP, and Xerox.

About Ultimate Technographics Inc.

Headquartered in Montreal, Canada, Ultimate Technographics is the recognized leader in automated digital imposition for digital printers. Since its inception 21 years ago with the first release of Imposition, the company has continued to play a leading role in the market ever since in providing the most innovative and progressive imposition software solutions. Ultimate is continually improving Imposition to be the first to take advantage of new operating systems and new technologies. Over 30,000 imposition engines have been sold to date to OEMs, prepress professionals and to digital printers around the world. The company has a rich history of providing integrated imposition technology into hardware and software workflow solutions for print industry leaders. For more information on our partners, visit:
