Ultimate delivers speed with new Imposition engine

Montreal, Canada, November 26, 2008. Ultimate Technographics, the leader in automated prepress solutions, releases its new Impostrip 8.5 version. Impostrip 8.5 offers a spectacular speed increase, new job optimization features and new functionality. The challenges in PDF processing constantly augment with the demand for short runs in both the offset and the digital print markets, as well as in the newspaper market where various localized versions call for more plates or more sheets but also for less time per print run.

“Processing PDF can become a bottleneck no matter how much you invest in hardware. Impostrip 8.5 Signature Server™ brings improved speed off 50% and more compared to previous version and depending on the nature of the files.” says Roberto Marroquin, Director, Product management.

Impostrip 8.5 new development is focusing on job optimization and automation and includes new functionalities such as:

- **Ganging of mixed binding and sizes:** More and more printers want to group jobs with different binding methods in order to optimize printing. Impostrip 8.5 offers the ability to mix and gang jobs into one output where different paper sizes and binding methods are mixed for optimization.
- **Automated Dutch cut imposition:** To optimize paper usage, customers can impose 2 A-4 with a third page in landscape position. This can be automated using **hot folder**.
- **PDF Compression for speedy output**
- **New Variables for Slug line and collating marks**
- **New client-server sharing MAC folders**
- **PDF level to match your Rip:** You can select PDF output to be compatible with Rips, ranging from PDF 1.4 to 1.7
- **JDF Cutting and Folding** certified with Polar, Muller-Martini, Horizon and Duplo, included in Impostrip Unlimited
- **Mac OS 10.5 compatibility**
- Acrobat 8 and 9 PS and PDF, InDesign CS3, etc.
- MAC International version includes English, German, French and Spanish.

About Ultimate

Headquartered in Montreal, Canada, Ultimate invented digital imposition 20 years ago with the first release of Impostrip, and has played a leading role in the market ever since in providing the most innovative and progressive imposition products. The company is continually evolving Impostrip to be the first to take advantage of new operating systems or DTP applications and over 150 other applications supported in PostScript and PDF. Over 30,000 imposition engines have been sold to date to OEMs, prepress professionals and digital printers around the world, and the company has a rich history of providing imposition technology into hardware and software workflow solutions for print industry leaders including Glunz&Jensen, HP, InfoPrint-Ricoh, Xerox, Xeikon and others. www.imposition.com
