## Impostrip On-Demand Digital v.5

## Overview

Impostrip On-Demand Digital is an imposition solution truly designed to automate digital printing. Regardless if you are a prepress pro or just starting in digital printing, Impostrip On-Demand Digital eases you into the world of imposition. Impostrip On-Demand Digital provides the professional features to manage an imposition workflow, including full control over page position, bleeds, page-spread, page scaling, marks and margins to produce brochures, books, cards in any finishing fashion. Automatic creep is calculated base on your selection of paper thickness. Use predefined templates or uses the Origami virtual paper folding tool that allows you to fold a sheet on screen to create new templates. Simply use the 'best fit' option and it will search for the best way to impose the project.

Impostrip On-Demand Digital's unique Dynamic Imposition allows a single hot folder to impose projects of various lengths and with various page sizes: Impostrip On-Demand Digital will automatically center pages and adjust marks and margins on the template producing as many sheets as each project requires with folio backing up perfectly.

Impostrip On-Demand advanced hot folder automation is flexible as it lets you define any job profile covering all aspects of the job to produce cut&stack, step-repeat, spiral, perfect bound or multiple booklets binding. Once the profile is saved as a hot folder, simply drop files from any workstation on the network or submit files via the Internet and print to the Xerox digital printer in one click.

### Impostrip FreeFlow integration

Impostrip hot folder can be accessed within FreeFlow process manager. Build workflow with automatic imposition using Impostrip. Drop your files in the workflow of choice and Impostrip picks up the files from one process, imposes them and sends them to the next process automatically.

### Impostrip fast Printing

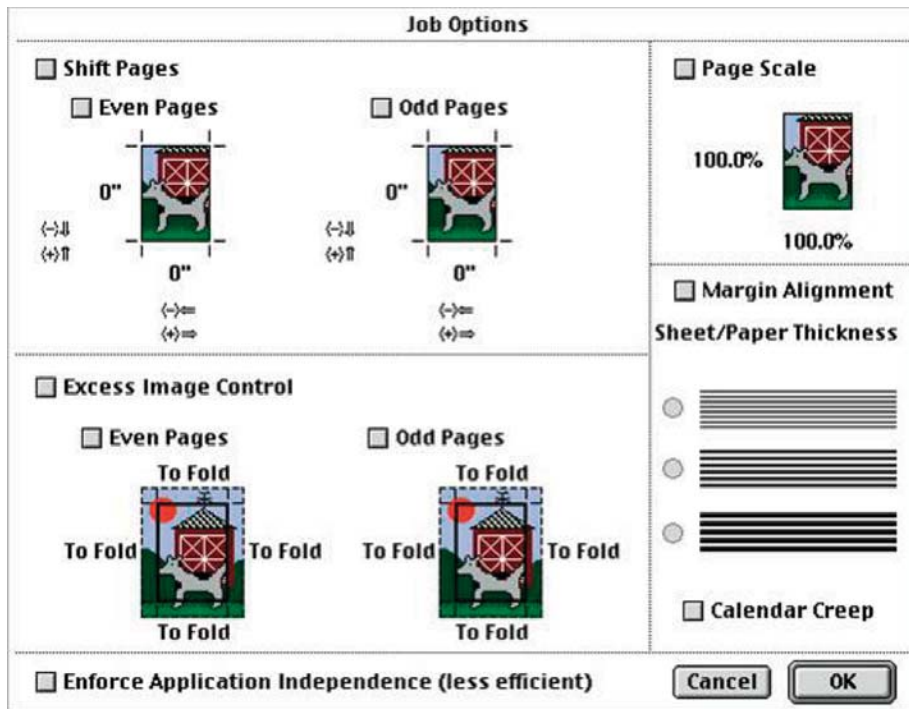

Impostrip On-Demand imposes PDF and Optimize PDF from XMPie and other VDP applications. It can create an optimize PDF imposition from regular PDF to print faster. It imposes EPS, Tiff and over 150 Postscript application files from Mac, Win and UNIX. It automates output of large VDP files in small groups to optimize Rip efficiency. PJTF and JDF output formats are included.

## Benefits

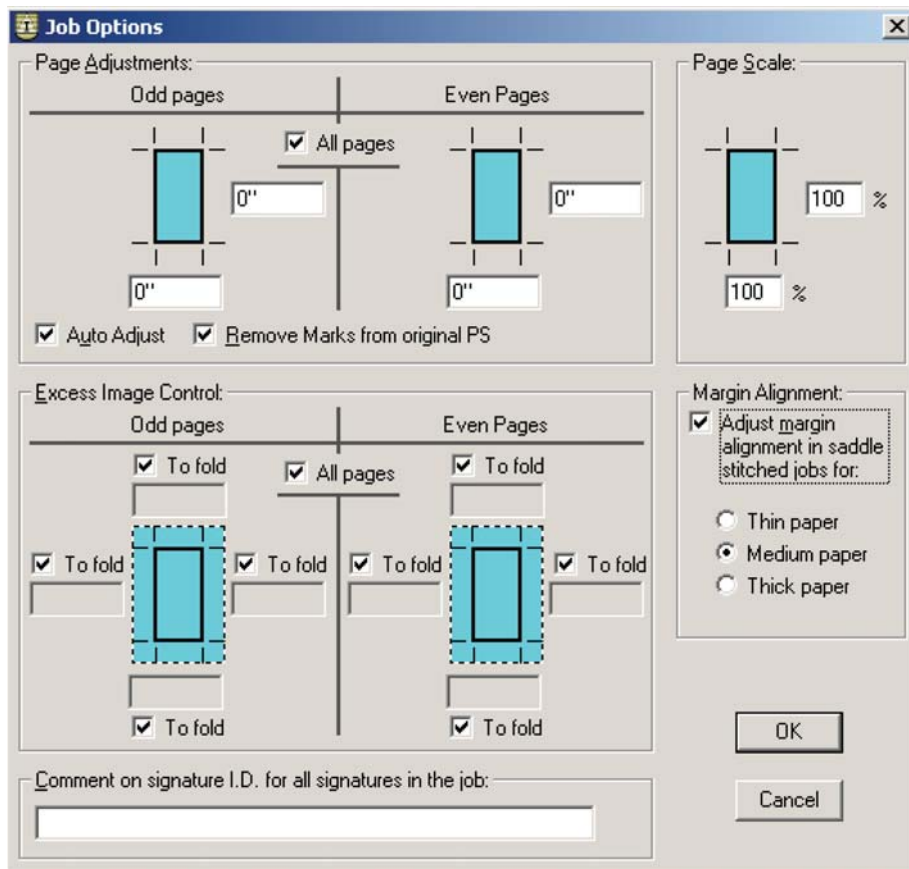

Impostrip On-Demand Digital increases the quality of each print, making any digital printer more profitable. Impostrip On-Demand means 'peace of mind' by insuring consistency from one project to another without the operator's intervention. It provides production efficiency to deliver short runs on time, all the time.

Impostrip On-Demand optimizes production by grouping more than one booklet on a sheet, thus cutting cost, increasing the profitability of each job and ROI on equipment. Impostrip On-Demand Digital's unique dynamic imposition offers the highest level of automation where 99% of the work can be processed hands-free using intelligent hot folders. It integrates directly into FreeFlow Process Manager for total workflow automation.

## Specifications

Windows Platform, Pentium 4 +,  
Ram: 256 Mb +, OS 2000 Pro, XP

Mac Platform, G4+, Ram 256 Mb +,  
OS X 10.3 or newer

## Xerox Products Supported

Continuous Feed, DocuColor, DocuPrint,  
DocuTech, FreeFlow collections Components,  
iGen3, Nuvera.

Note: Imposition On-Demand Digital integrates  
with FreeFlow Process Manager to streamline  
imposition.
